✓ Done

Description

In ideation phase, we need to analyze existing solutions, empathize with the customers and define the problems. When designing a solution to a problem, it's important to understand who we're designing for, so you can keep their needs, challenges, behaviors and attitudes in mind while we design.

Description

Our Proposed Solution is analyzed by its idea, novelty, uniqueness, social impact and scalability of the project. Then the Customer's Satisfaction, Behaviors and Emotions are also observed in the solution fit and an architecture of our solution is designed.
